Rubber Corner Guards

- A natural rubber corner guard with yellow reflective stripes.
- Ideal for protection of columns and building corners from vehicle scraping when navigating tight spaces.
- Easily fixed with glue or mechanically.

Code CNRGRD-RUB/BLK

Dimensions 800 x 90 x 90 mm

Applications Retail Centres, Airports, Apartments.

Installation Note

Rubber Corner Guards are primarily installed using Icons Allrounder adhesive. Apply a liberal amount of glue to back of corner guard. Place the Corner Guard against the column with the bottom on the ground. If possible, place easy to remove tape to the column/wall or on the wall to prevent the Corner guard from falling off. If you wish to install them higher up the column/wall, you can use a fixing of your choice to fasten them so they don't slip down the wall.
