PRODUCT DATA SHEET

Wet Area Mat

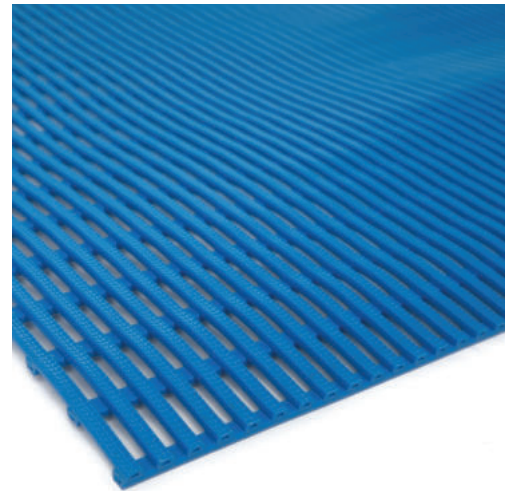

Gripper Matting

Gripper Matting is designed and manufactured from extremely strong and hard wearing non toxic food grade PVC.

Gripper Mat's tubular top surface and underbars are designed to create maximum cushion comfort underfoot. Its slip resistant surface constructed in grid formation make it an ideal working surface where water and other liquids are present.

Gripper Mat's cushioned tread not only reduces slips and falls but it raises people slightly above floor level, so any spillage will drain through where it can be cleaned later.

- PVC product that is resistant to most chemicals including alcohol making it ideal for behind bars.
- A very good anti-slip matting for wet areas especially around pool areas.
- The textured finish on each tube provides extra grip.
- UV stabilised – ideal for both exterior and interior use.

Code	Size & Thickness
195M90C	900 mm wide runner
195M120C	1200 mm wide runner
	900mm x 10.0m
	1200mm x 10.0m
	Thickness: 9 mm
