

CLEANING GUIDE

GYM TILE

Ensure the Gym Tile is placed on a clean, flat surface before starting the cleaning process.

Start by removing any dust or dirt from the mat using a soft bristle brush or a dry cloth. If the mat is located outdoors, use a hose or water source to wet the surface of the mat. Mix mild soap or detergent with water in a bucket or container. Dip a soft bristle brush or sponge into the soapy water solution. Gently scrub the entire surface of the Gym Tile. Rinse the mat thoroughly with clean water from a hose or water source, ensuring all soap residue is removed.

If desired, you can use a pressure cleaner to clean the Gym Tile. Adjust the pressure setting to a level that is safe for the mat's material. Spray the mat evenly, using sweeping motions, to remove dirt. Rinse the mat thoroughly with clean water to remove any cleaning solution.

DO NOT USE DEGREASERS OR CAUSTIC CHEMICALS

Please Note:

To prevent the voiding of any applicable guarantees, careful and routine maintenance is required. This information is based on our prior knowledge and the outcomes of thorough testing. Different site characteristics and usage patterns could have an impact on the practical application. Before performing any cleaning or maintenance, it is always advisable to seek specialised guidance from a trustworthy cleaning professional. The information provided here is just meant to serve as a general guide.
