

CLEANING GUIDE

DURACLEAN

Our Duraclean Matting is designed to reduce your maintenance costs and still be easily maintained. For the best results and longevity, matting in high traffic areas should receive regular cleaning.

- Vacuum matting with a good quality vacuum cleaner, if available a power head will achieve the best results
- Matting can be spot cleaned or dry cleaned in place on a regular basis
- Household chemicals can be used as recommended by the manufacturer.

DO NOT USE DEGREASERS OR CAUSTIC CHEMICALS

Please Note:

To prevent the voiding of any applicable guarantees, careful and routine maintenance is required. This information is based on our prior knowledge and the outcomes of thorough testing. Different site characteristics and usage patterns could have an impact on the practical application. Before performing any cleaning or maintenance, it is always advisable to seek specialised guidance from a trustworthy cleaning professional. The information provided here is just meant to serve as a general guide.
