

CLEANING GUIDE

NATURAL COIR MATTING

Our Natural Coir Matting is designed to reduce your maintenance costs and still be easily maintained. For the best results and longevity, matting with high foot traffic should receive regular cleaning.

Vacuum matting with a good quality vacuum cleaner, if available a power head will achieve the best results

DO NOT USE DEGREASERS OR CAUSTIC CHEMICALS

Coir is a natural fiber that comes from the husk of coconuts, and it can be damaged by harsh chemicals.

Please Note:

To prevent the voiding of any applicable guarantees, careful and routine maintenance is required. This information is based on our prior knowledge and the outcomes of thorough testing. Different site characteristics and usage patterns could have an impact on the practical application. Before performing any cleaning or maintenance, it is always advisable to seek specialised guidance from a trustworthy cleaning professional. The information provided here is just meant to serve as a general guide.
